Total Cholesterol:	Triglycerides:
HDL:	LDL:
Glucose/A1C Date:	
Fasting Status: <input type="checkbox"/> Fasting <input type="checkbox"/> Not Fasting <input type="checkbox"/> Unknown	
Glucose:	A1c:

<b>Breast Cancer Screening</b>	
Breast Cancer Risk Assessment: <input type="checkbox"/> Average <input type="checkbox"/> High* <input type="checkbox"/> Not performed	
Clinical Breast Exam Results (CBE): <input type="checkbox"/> Normal Exam <input type="checkbox"/> Benign Finding <input type="checkbox"/> Bloody or serous nipple discharge <input type="checkbox"/> Nipple or areolar scaliness <input type="checkbox"/> Skin dimpling or retraction <input type="checkbox"/> Discrete palpable mass previously diagnosed as benign <input type="checkbox"/> Discrete palpable mass <input type="checkbox"/> Not performed	

<b>Mammogram (current or most recent results)</b>		
Indication:	<input type="checkbox"/> Screening	<input type="checkbox"/> Diagnostic
Type:	<input type="checkbox"/> 2D	<input type="checkbox"/> 3D
Date:	Location:	
Mammogram Result: <input type="checkbox"/> BI-RADS 0 – Incomplete, additional imaging/comparison is required <input type="checkbox"/> BI-RADS 1 – Negative <input type="checkbox"/> BI-RADS 2 – Benign Finding <input type="checkbox"/> BI-RADS 3 – Probably Benign <input type="checkbox"/> BI-RADS 4 – Suspicious Abnormality <input type="checkbox"/> BI-RADS 5 – Highly Suggestive of Malignancy		
Next mammogram scheduled for: Date:                      Location:		

<b>Cervical Cancer Screening (current or most recent results)</b>		
Cervical Cancer Risk Assessment: <input type="checkbox"/> Average <input type="checkbox"/> High* <input type="checkbox"/> Not performed		
Pap Test Indication: <input type="checkbox"/> Screening <input type="checkbox"/> Surveillance		
Date:	Location:	
Pap Test Result: <input type="checkbox"/> Unsatisfactory <input type="checkbox"/> LSIL <input type="checkbox"/> Negative for intraepithelial lesion or malignancy <input type="checkbox"/> Squamous cell carcinoma <input type="checkbox"/> ASC-US <input type="checkbox"/> Adenocarcinoma <input type="checkbox"/> ASC-H <input type="checkbox"/> Adenocarcinoma in situ <input type="checkbox"/> AGC <input type="checkbox"/> Not performed <input type="checkbox"/> HSIL <input type="checkbox"/> Other:		
HPV Indication: <input type="checkbox"/> Co-testing/Screening <input type="checkbox"/> Reflex		
Date:	Location:	
HPV Test Result: <input type="checkbox"/> Negative <input type="checkbox"/> Not performed <input type="checkbox"/> Positive (genotyping not done) <input type="checkbox"/> Positive, but negative for genotypes 16 and 18 <input type="checkbox"/> Positive for genotypes 16 and 18		
Next cervical cancer screening scheduled for: Date:                      Location:		

You First is a program run by the Vermont Department of Health assisting income-eligible Vermont residents to receive breast cancer, cervical cancer and heart health screening. Additionally, the program provides:

- Clinical navigation to members with abnormal screening results, at high risk for breast or cervical cancer, and those transitioning to treatment
- Health coaching to reduce cardiovascular disease risk and connection to home blood pressure monitoring, weight loss, exercise, and other healthy behavior support programs

More detailed information about You First and the services covered/provided by the program can be found on our website or by calling us at 800-508-2222.

### Definitions

1. **Risk reduction counseling** entails:

- Using motivational interviewing to discuss participant's screening and health risk assessment results.
- Making accommodations as needed to address a patient's language, health literacy, and cultural background.
- Assuring participant understands their CVD risk as compared to other people their age.
- Identifying strategies together to support health goals.
- Linking to available resources to improve health outcomes.
- Arranging follow-up for patients with uncontrolled hypertension.

2. **Health coaching** uses a patient-focused approach to prepare patients to take responsibility for their health and well-being. Coaching can include:

- Building skills related to nutrition, exercise or quitting smoking.
- Helping patients access community resources such as weight loss programs or fitness centers to improve health outcomes.

3. Patients are considered to have a **high breast cancer risk** that have one or more of the following:

- Known genetic mutation(s) such as BRCA 1 or 2
- First-degree relatives with premenopausal breast cancer
- Radiation to the chest before the age of 30
- Lifetime risk of 20% or more for development of invasive breast cancer
- Personal or family history or genetic syndromes
- Previous history of breast cancer

4. Patients are considered to have a **high cervical cancer risk** that have or more of the following:

- Have had a solid organ or stem cell transplant
- Who may be immune-compromised (e.g. infection with HIV or other disease)
- Who were exposed in utero to diethylstilbestrol (DES)
- Previous history of cervical cancer
